MOBILE SOLUTIONS FOR A MOBILE WORLD

What you need to know about Kalipso

What is Kalipso?

Kalipso is a platform for you to develop applications for Windows CE and Pocket PC in a fast and easy way. You don't need to be an expert to develop for these platforms.

What does Kalipso do?

Kalipso enables you to develop applications in less time and with less costs, test your project and export it to the terminals. All with simple clicks and Drag and Drop operations.

Where can I use Kalipso?

You can use Kalipso in almost any terminal of the main manufacturers and build your applications in any other PC.

My Warehouse works around the clock, can Kalipso create a safe, stable application?

Yes it can, and it has. Many customers have Kalipso applications working under stressed conditions.

What kind of applications can I create with Kalipso?

Kalipso is capable of working with almost any field of activity. Read all about it in the following pages.

What about technology, does Kalipso support RFID and Voice Recognition?

Yes, indeed. Kalipso has specific functions for RFID. Voice Recognition will boost your personnel's accuracy and efficiency in little time.

Who uses Kalipso?

Many companies use Kalipso, from Post Offices, Food warehouses, Sales teams, Transportation and Logistics companies and many others.

Why do you say Kalipso is easier and faster?

Mainly because most of the work is done. All you need is to pick what you need from a list, export it, connect it and its ready for use.

Building applications with Kalipso for mobile devices, based on Microsoft Windows CE platform, is extremely easy and fast.

Target Markets

- Distribution;
- Manufacturing;
- Logistics;
- Construction;
- Utilities;
- Energy;
- Engineering;
- Sales;
- Government Agencies;
- Warehouse Management;
- Any mobile activity application.

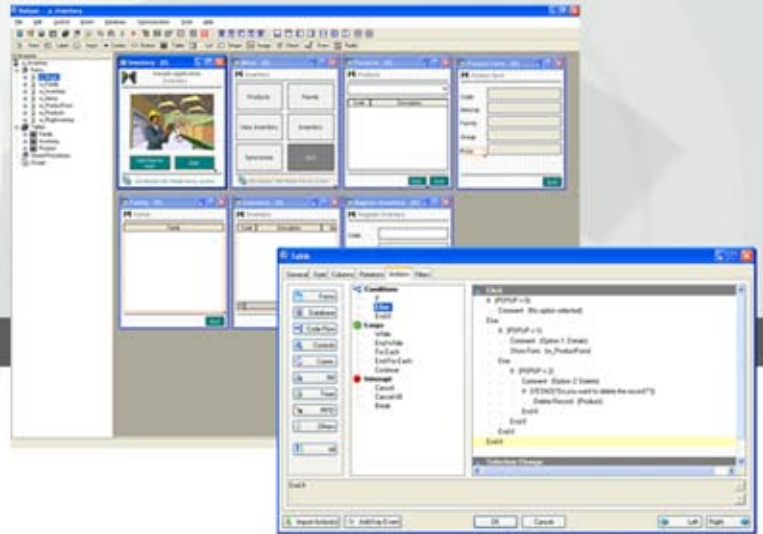

WORLDWIDE MOBILITY

KALIPSO ENVIRONMENT

Kalipso is a product oriented for programmers and non programmers. This allows anyone to develop or change an application in a fast and intuitive way.

Use Kalipso's objects to build data collection screens, fields of data entry, lists, buttons, and many others within minutes.

With a user friendly and graphical environment it allows the creation of prototypes as well complex projects either in online or offline modes.

BUILT IN FUNCTIONALITY

Actions

Actions are the core of the application, they define the application's behaviour. There are actions associated to screen events, data entry fields, buttons, pictures and others.

Functions

- User friendly interface;
- Screen creation by Drag and Drop;
- No programming knowledge required;
- Connections with external databases;
- Remote queries;
- Online and offline modes;
- Socket and TCP/IP connections;
- RFID;
- VOICE.

Objects

- Text Box;
- Input Box;
- Combo Box;
- Button;
- Screen signature;
- Frames;
- Barcode;
- Others.

Add records, validate codes and synchronize data are, among others, some of the actions which can be used in your projects.

KALIPSO - RANG

Kalipso is a powerful tool, using a wide number of the available technologies in the market.

Network

Barcode

RFID

VOICE

The Kalipso platform allows the creation of applications for mobile devices based on Microsoft WindowsCE and Pocket PC operating systems in a fast and intuitive way.

Capable of generating online (wi-fi, GPRS, ...) or offline (with intrinsic synchronization processes), this platform allows the generation of applications for a numerous array of activities.

Kalipso will help your business evolve and stay up to date.

Kalipso is capable of creating an application for the most varied type of work.

The diagram in the next page shows the potential of this platform, that allows the use of the many ways of data capture, being RFID, VOICE, socket, barcode and their manipulation either in offline or online modes.

Warehouse operations (receiving, inventory, picking), price checking, visit and technical intervention reports, order and sales registry are among others, examples of areas where this platform will apply.

Kalipso's range of utilities shows the product capabilities presently available for projects in any business. With Kalipso, apply your project to the hardware you need.

MAKE YOUR BUSINESS PROFITABLE WITH KALIPSO

GE OF UTILITIES

KALIPSO'S DISPLAY OF MULTIPURPOSE CAPABILITIES

Delivery - Receiving - Postal services - Logistics - Technical services - Warehouse Management - Auto Sale - Pre Sale - Labor management - Order control - Distribution - Manufacturing - Construction - Utilities - Energy - Engeneering - Government Agencies - And many other mobile activity application.

Use the available samples to familiarize yourself with the actions, objects and database connection management best suited for your needs.

KALIPSO VOICE

IMPROVE YOUR ACCURACY AND PRODUCTIVITY WITH KALIPSO VOICE

USE YOUR VOICE TO MANAGE YOUR SYSTEM

What is KALIPSO VOICE?

KALIPSO VOICE is a product integrated in the Kalipso platform using speech recognition and synthesis.

With this product, you can create applications controlled only by voice, allowing the operators to work concentrated on their tasks, hands free and with no need to look at the terminal, enhancing efficiency and productivity.

Create voice controlled solutions with Kalipso VOICE

Use the Kalipso VOICE capabilities to develop stable and reliable applications to manage your system's functions. By allowing the creation of voice profiles for nonnative operators, or using the standard ones for the native, Kalipso VOICE powers easy and effectively the integration of operators from different nationalities and accents.

You can create applications to interact with existing applications (based on emulation) or create your own in Client-server mode.

Where can I use this VOICE application?

The most common application is Order Picking where improved accuracy and productivity offer a fast payback.

It can also be combined with many other tasks like, Goods Receiving, Inventory, and many others.

MOBILE SOLUTIONS FOR A MOBILE WORLD GO MOBILE WITH KALIPSO

Kalipso is a fast mobile application generator for the Microsoft WindowsCE and Pocket PC platform

With Kalipso the time reduction in the developing of applications as well as the costs involved are significantly reduced, giving the users more competitiveness.

With simple mouse clicks and 'Drag and Drop' operations, the application is developed and transferred to the terminal.

Quickly modify and adapt your application according to your customer's needs.

With the Kalipso platform you can develop more, in less time, liberating resources for use in other projects making your time more effective and profitable.

Purchase the Kalipso Designer for full capabilities and apply your projects for success.

Kalipso is used in several countries with different languages and equipment. These companies trust their daily routines to Kalipso's functions and objects.

SYSDEV provides regular updates, support and formation services to our partners.
